John Peña | Full Stack Web Developer

(646)9205848 | JohnP.Codes@gmail.com | JohnPena | linkedin.com/in/john-pena https://johnalexanderpena.com

Full Stack Developer experienced in Ruby on Rails, React, and Javascript, with prior background in Retail Management and Medical Logistics. Dedicated and passionate about building innovative applications that make the world a better place. Detail oriented problem solver, and learning new things everyday.

TECHNICAL PROJECTS

Developer Forums Application - *A forum for developers to socialise and view profiles of other developers.*

Demo Video* | *Back-End Code* | *Front-End Code

⦿ Built with JavaScript ES6, and React, using Node.js for the back end, and MongoDB for the database.
⦿ Used BCrypt password hashing function and JWT web tokens for user authorization and auth based routes.
⦿ Implemented Redux to handle state transfers, used Bootstrap for dynamic style rendering and used Github Api for data.

Instagram Clone - *A React App Clone of Instagram. Able to like, comment, view photos, follow/unfollow users.*

Live Demo* | *Demo Video* | *Github Code

⦿ Built in React using Firebase for the database and authentication.
⦿ Used React Context API to handle state management along with latest React Hooks to handle logic.
⦿ Styled and configured using Tailwind CSS, and React Skeleton.

Amazon Clone - *Meal Prep Application designed to help users eat healthier and keep track of macros.*

Live Demo* | *Github Code

⦿ Built in React using Firebase as the hosting, storage and database.
⦿ Used React Router, Redux, CSS, Express, along with Firebase Authentication to style and control user flow.
⦿ Integrated Stripe API to handle processing of orders.
⦿ Integrating product API to be able to search products throughout Amazons database.
